

# Komodo dragons notes

---

By Dakota Phillips

Komodo dragons live on  
           In Indonesia  
and Komodo.

The Komodo dragon  
holds \_\_\_\_\_ strands of  
bacteria in their

\_\_\_\_\_.

There are \_\_\_\_\_  
different types  
of venomous  
Komodo  
dragons

Komodo dragons  
mate in the months  
\_\_\_\_\_ - \_\_\_\_\_ and lay  
eggs in the month of  
September.

\_\_\_\_\_

Komodo dragons are carnivores so they only eat \_\_\_\_.
