ALL THINGS TOADS

TOADS

- Ever wonder what the difference is between a frog and a toad? "Look at that cute frog!" you'll be able to say, "That's not a frog, that's a toad!"

- Frogs and toads are both _____ in the order
- _____.
- Toads are a _____ of frogs, meaning that all toads are frogs, but not all frogs are toads
- Up to 15cm (6in) long, but generally more like 8cm (3in).

DURING THE DAY, COMMON TOADS
TEND TO TAKE REFUGE IN _____
IN THE GROUND OR OTHER _____
AREAS SUCH AS LEAF PILES OR _____
HEAPS.

What do they eat?

- Toads eat _____, _____, slugs, _____, and other invertebrates like other amphibians do. As tadpoles, they eat plants. Toads, as pets, will eat fruit or vegetables.

Classification

- Toads are classified in the phylum _____, subphylum _____, class _____, order _____. The genus that includes more than 300 species is Bufo of the family Bufonidae.

FUN FACTS

- Do not need to live near water to survive
- Have rough, dry, bumpy skin
- Have a wider body
- Have lower, football shaped eyes
- Have shorter, less powerful hind legs
- Will run or take small hops rather than jump
- Do not have many predators. Toad's skin lets out a bitter taste and smell that burns the eyes and nostrils of its predators, much like a skunk does.
